

# Sample Config

## Mikrotik

### MIKROTIK RADIUS CONFIG

The screenshot shows the Mikrotik WinBox RADIUS configuration window. The title bar indicates the IP address 192.168.88.43. The window is divided into two main sections: configuration fields on the left and actions on the right. The configuration fields include Service (ppp, login, hotspot, wireless, dhcp, ipsec, dot1x), Called ID, Domain, Address (redacted), Protocol (udp), Secret (masked), Authentication Port (1812), Accounting Port (1813), Timeout (3000), Accounting Backup (disabled), Realm (mikrotik.rommel1.id), Certificate (none), and Src. Address (0.0.0.0). The Actions section includes a Reset Status button. The Status bar at the bottom shows Cancel, Apply, and OK buttons.

**Service**

- ☐ ppp
- ☐ login
- ☒ hotspot
- ☐ wireless
- ☐ dhcp
- ☐ ipsec
- ☐ dot1x

**Called ID** +

**Domain** +

**Address** [Redacted]

**Protocol** udp

**Secret** .....

**Authentication Port** 1812

**Accounting Port** 1813

**Timeout** 3000

**Accounting Backup** ☐

**Realm** mikrotik.rommel1.id

**Certificate** none

**Src. Address** 0.0.0.0

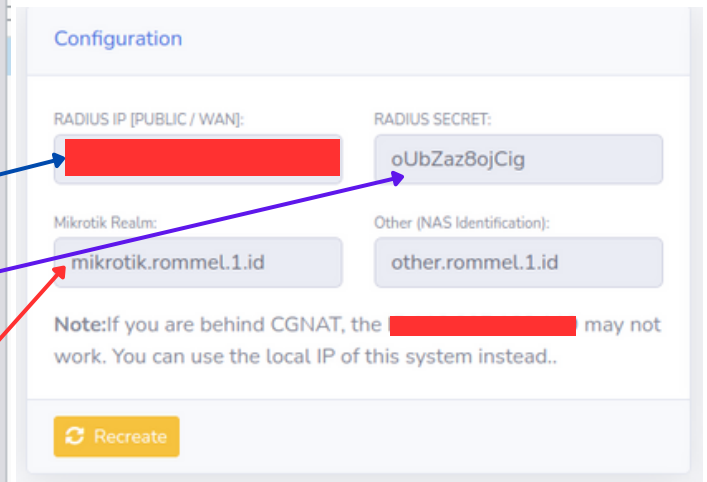

**Actions**

Reset Status

Status

Cancel Apply OK

### MENDYFI CONFIG PAGE

The screenshot shows the MendyFi Configuration page. It includes fields for RADIUS IP [PUBLIC / WAN] (redacted), RADIUS SECRET (oUbZaz8ojCig), Mikrotik Realm (mikrotik.rommel1.id), and Other (NAS Identification) (other.rommel1.id). A note states: "Note: If you are behind CGNAT, the [Redacted] may not work. You can use the local IP of this system instead..". A Recreate button is located at the bottom.

**Configuration**

**RADIUS IP [PUBLIC / WAN]:** [Redacted]

**RADIUS SECRET:** oUbZaz8ojCig

**Mikrotik Realm:** mikrotik.rommel1.id

**Other (NAS Identification):** other.rommel1.id

**Note:** If you are behind CGNAT, the [Redacted] may not work. You can use the local IP of this system instead..

**Recreate**
